

## Investment Philosophy

Alta Capital Management believes companies with high free cash flow growth yield superior investment returns with nominal risk. The tenets of our process encompass the following:

- Quality factors are key to long-term alpha generation
- Growth in earnings and free cash flow fuels higher stock prices
- Sustainability of earnings growth, profitability and competitive advantages drives future cash flow generation
- Superior FCF growth with lower EPS variability leads to more resilient, risk-adjusted outcomes

## Key Characteristics

- Robust cash flow generation
- Secular earnings growth with lower earnings per share variability
- Sustainable competitive advantages
- Profitability throughout the economic cycle
- Financial flexibility
- Valuation consciousness

## Investment Process

Companies are identified through a fundamental, bottom-up investment process, beginning with a universe screen that seeks to identify companies that demonstrate financial strength, strong profitability, and a favorable track record.

Further analysis of these firms using Alta's proprietary free cash flow model, helps define the present value of the company. Fundamental analysis validates the strength of the company's management, business, and future performance expectations.

Favorable culmination of this process is the recognition of a security whose current trading value is significantly less than its intrinsic value. For the security to establish a position, the Investment Committee must confirm eligibility, appropriate entry price target, and proper placement within the portfolio.
